 - Heinz Edelmann, (Bamberg)
 - The Bamberg photographic plate archive - the digitization project
 - Jochen Klar, (Potsdam)
 - Daiquiri - A framework for the publication of scientific databases
 - Adrian Partl, (Potsdam)
 - PaQu - Getting the most out of MySQL with distributed queries

EScience & Virtual Observatory

Is the “Data Deluge” sparing Germany?

Is the participation of Germany in building and operating astronomical data sources adequately mirrored in the data providing facilities?

Is the availability of data processing infrastructures meeting the demands and needs of the community?

Is the astronomy software up to anticipated tasks?
